

EBSCOHost (EBooks) at EuNC

What is EBSCOhost?

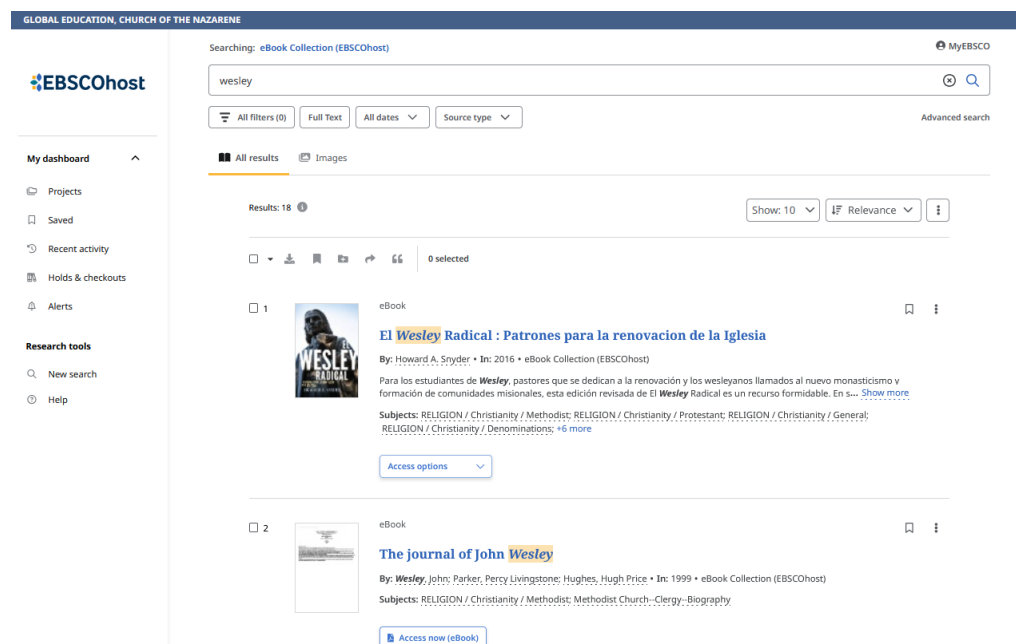

EBSCOhost is one of the eBook vendors that EuNC is using for delivering eBook titles to our students, faculty and staff. In order to find out what books are available, it is advised to start with Koha for your search (<https://koha.eunc.edu>). In Koha, you can search for the titles you are looking for and it will show you all areas you can access them including print/physical copies, online resources, OverDrive, EBSCO, Cambridge, WHDL, or ProQuest copies. Then, you can determine the best way for you to get ahold of the book.

How do I access an EBSCO book?

Login to Moodle and in the Quick Links area (you may need to open up the block near the top right corner to see the block) you will see an option for “EBSCO Ebooks”. Click on that icon/link text. This will take you to the EBSCOhost search screen.

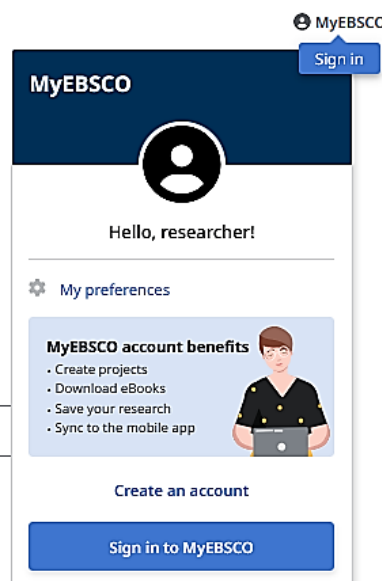

Here you can search by keywords or a title to find a book. Below is an example searching on “Wesley”.

You can see below the search box a Filter area which will allow you to narrow your search by language, publication date, subjects, etc. You can read it fully online without any additional work. To be able to download the book or to access them directly from a link in Koha, you will need to create an account. See below for instructions on that.

Create an Account

In order to download books or click on a link for what you found in Koha, you must first create an account with EBSCO. To do this, you must start with Moodle and go to EBSCO Ebooks like is mentioned above. Now, click on the “MyEBSCO” link at the top right.

This brings up a box to either login or create an account. (see screenshot to the left).

In this case, click on “Create an Account”.

Fill in the information (see screenshot to the right) and click the Create Account button.

Create your account

Already have an account? [Sign in.](#)

First name

Last name (optional)

Email address

Create password

☒ One number
☒ One special character
☒ Do not include email address

☒ Six character minimum
☒ Do not include username
☒ Do not include common phrases

☒ I consent to the collection of specific data that allows EBSCO to provide me with a MyEBSCO account and related research functionality, as detailed in EBSCO's [Privacy Policy](#).

Create account

Account benefits

Sync with the mobile app

Take your research on the go. Search, read and listen in the app!

[iOS](#) | [Android](#)

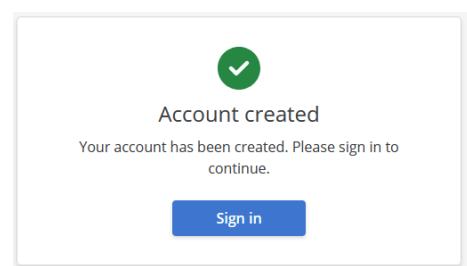

Download eBooks

Access thousands of eBook titles to read and download.

Create projects

Keep your research organized within custom projects.

It should then give you a confirmation screen where you can Sign in.

The benefits of creating an account include: using apps for access to the eBooks on your devices, tracking and managing projects you are working on, downloading the titles and more. This account creation only needs to be done once.

Once you have created an account, you can then download chapters of the eBook from the web interface to your local machine. It won't allow you to download the full eBook on a laptop or desktop or with the web interface. In order to do that you will need to download the Thorium app. See the instructions below. Unfortunately, it is not available currently for Android devices.

Downloading eBooks to a Device

EBSCO is using the open source Thorium Reader for off-line eBook access for Windows, Mac, Linux and IOS (Apple Mobile). Unfortunately, there is currently not a Thorium Reader version for Android. You can download the Thorium Reader from here:

<https://thorium.edrlab.org/en/>

Example Direct Install on Windows

Use your normal procedure to install the app on your device if you aren't using Windows.

Download the installer from the link <https://thorium.edrlab.org/en/> or by searching in the Windows Store and install like it similar to other applications for your system.

When running the app the first time, it will give you a tutorial if you want it.

Using the Thorium Reader in Windows

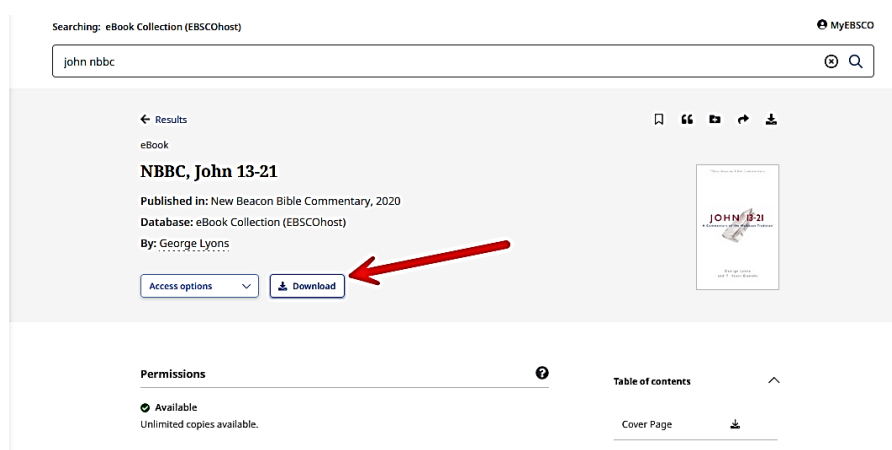

This should be similar to how other devices use it as well.

For a video with help downloading eBooks with EBSCO go here:

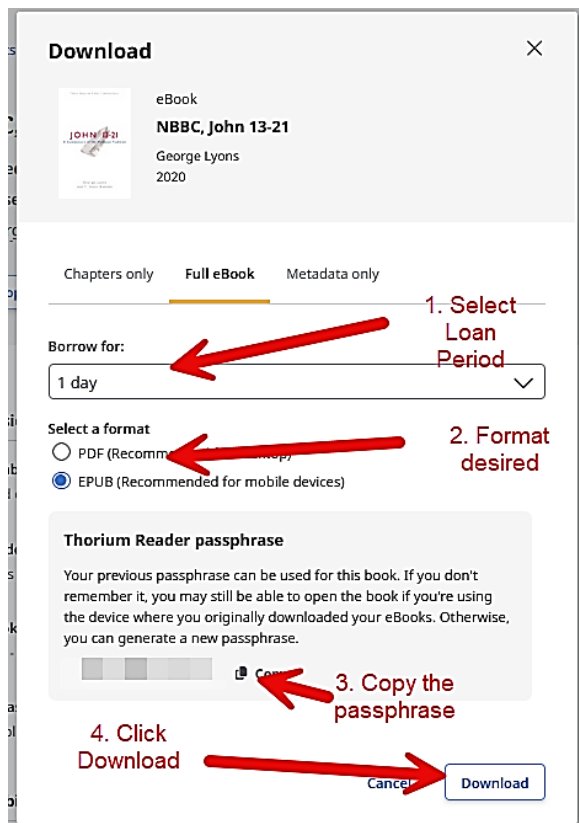

<https://www.youtube.com/watch?v=JZwURRyVXxQ>

General Steps

1. First install the Thorium Reader either through the Windows Store or Direct Download.
2. Now, go to Moodle and click on the link to EBSCO Ebooks
3. Sign into your MyEBSCO account you created above.
4. Search for the book you want to read/download
5. Click on the Download button which will open up other fields you need to select.

6. Make your selections and click on the final download button which will download the book to your device (but not directly to Thorium Reader)

7. Now go to your Thorium Reader
8. In "Home" or "All publications" click "+Import publication"
9. Browse to your windows download area and click on the downloaded eBook and click open.
10. You should see it downloaded.
11. Click on the title and it will ask for the Passphrase that you copied earlier. Paste it in here then click open. This is only needed the first time you open the title.
12. You are now set to use it for the duration of the loan period.
